WE WORK FOR YOU

Dear Customer,

DALE ELECTRIC SUPPLY CO, INC is the **CATALOG & INTERNET** division of Hill Electric Supply, a firm which has been in business since 1948 enjoying an excellent reputation both with customers and suppliers.

We want you to know that you are buying from a long established, reputable company selling quality merchandise and guaranteeing everything we sell.

We look forward to serving you through our website at www.dale-electric.com and this illustrated catalog.

Sincerely,

Scott Schwartz, President

Satisfaction Guaranteed
OR MONEY REFUNDED

COMPLETE SATISFACTION IN 2 WAYS.

1. WE GUARANTEE ALL OUR PRODUCTS! You must be completely satisfied with every item you purchase. It must be just as we described and just what you expected. If you are not absolutely satisfied, simply return the merchandise within 30 days for full credit, refund, or replacement.

2. WE GUARANTEE OUR SERVICE! You must be completely satisfied with the way your order was handled and the promptness of shipment. You have the right to expect the best!

SERVING OUR CUSTOMERS FOR 78 YEARS

Our parent company, Hill Electric Supply Co. Inc., has been in business since July 26, 1948, serving local builders, contractors, facility managers and end users. From our 43,000 sq. ft. facility in upstate New York, we service customers near and far.

1948 - July 26th, Hill Electric Supply Co. Inc. was founded by Morris Schwartz.

1952 - Hill Electric moved to our current location in Glens Falls, NY.

1964 - The image to the left depicts founder Moe Schwartz (in the dark suit) interacting with customers.

1972 - Dale Electric Supply was created as the mail order subsidiary of Hill Electric upply Co Inc. Through an illustrated and priced catalog, Dale Electric serves customers throughout all 50 States.

1996 - Dale-Electric.com e-commerce web site was launched. Dale-Electric.com offers over 600,000 items from over 100 manufacturers in our searchable online data-base. Images, specification sheets, comparisons to alternative products and volume pricing are a few of the many tools that we offer.

1999 - International Sales department was formed. To date we have sold in more than 36 countries worldwide. In addition to electrical products, we are able to source almost any product that our customers require. We consolidate products from multiple manufacturers on one concise invoice to reduce freight and transactional costs. We offer freight forwarding services if required.

2003 - Lighting retrofit department was established, assisting customers to improve energy efficiency & quality of lighting.

2024 - EZEnergySave.com website launched. Customers can see the reduced prices they will pay for new LED lighting because of utility incentives.

SNAP–N–SPRAY®

Reusable Switch & Receptacle Covers

Labor saving paint guards now permit the inclusion of switches and receptacles with all other rough wiring components.
Devices are protected during painting, plastering, and/or spray texturing; then easily removed for installation of face plates.
SNAP-RC does not work with 5325 Leviton receptacles.

OCCUPANCY SENSORS

LUTRON

OCCUPANCY SENSOR & VACANCY SENSOR

OP600M

MS-OPS2
MS-OPS5M

Occupancy/vacancy sensors automatically turn lights on when you enter a space and off when you leave, making them a convenient way to save energy in a home or commercial space. Ideal for rooms where lights are accidentally left on, such as an office, or rooms that you often enter with your hands full, such as a laundry room or supply closet.

Applications

- For general loads, indoors or out, including lighting, industrial and commercial applications
- Built in accordance with NEMA, ANSI, UL and CSA standards
- Other sizes and voltages available as custom
- Wall mount brackets avl. for units up to 75 kVA
- Cores of high quality electrical steel
- Meets DOE-2016 Standard for efficiency
- NEMA 3R-rated enclosures standard
- 60 Hz operation
- Aluminum windings
- Primary taps

PANEL/LINK™ Manual Transfer Panels

The Panel/Link TRC offers circuit breaker combinations of 30A-125A utility and generator. Interlinked circuit breakers keep the generator isolated from the utility at all times. May be used as Main or Sub-panel. All panels have 12 - 1" circuit breaker openings and handle up to 20 circuits.

Yes/No indicates whether or not the optional inlet or meter is included.

(Use Siemens Type Q Breakers, or Murray Type MP Breakers)

MANUAL TRANSFER SWITCH

Circuit breaker combinations of 60A - 125A utility and 30A - 125A generator. Interlinked circuit breakers keep the generator isolated from the utility at all times, even with the deadfront removed. Suitable for service entrance and may be used as a main panel for a single load or to feed a sub-panel. Indoor rated.

To Calculate Roof Cable Length Needed:

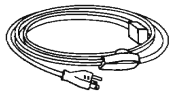

1. Roof Length X Roof Multiplier (Multipliers shown include 1' of gutter cable per foot of roof edge.)
2. Measure Dormers (up, over, down)
3. Calculate Valleys (6' minimum each)
4. Calculate Downspouts
   End of run equals spout length
   Along run equals 2 X spout length

MECHANICAL LUG CRIMPERS
For Aluminum & Copper Lugs

Model 50008 has a pull-out handle design which provides increased leverage. At 500MCM, model 50008 requires less handle load than 250MCM tools require at 250MCM.

- **For Aluminum & Copper Lugs.**
- **Buy One Tool - No Dies to order or lose.**
- **Cost is less than expensive hydraulic tools.**
- **High strength steel body.**

ADJUSTABLE TORQUE SCREWDRIVER

- Used for assembly and maintenance applications in accordance to 2017 NEC
- Simple torque adjustment
- Clutch releases automatically when preset torque is attained
- Adjustable torque from 0 - 36 in. lbs.
- Bi-directional accuracy (+/- 6%)
- Dual metric and imperial scale for versatility
- 1/4 in. hex drive accepts many bits, sockets and adapters

Features a variable torque range of up to 36 in. lbs. and unique torque limiting clutch that will disengage once the preset torque has been reached. This feature prevents over-tightening which can cause possible damage to components and final products.

Single Range Non-Contact Voltage Tester, 50 to 600V AC automatically detects & indicates the presence of voltage within range of range of 50 to 600V AC

No.	Description	Wt.	Each
61-627	CAT IV 600V AC, 50 to 600V AC	1	16.65
61-637	CAT IV 600V AC, 24 to 600V AC	1	27.73

VOLTAGE TESTER

Non-contact voltage tester that automatically indicates low voltage (12-48V AC) and standard voltage (48-1000V AC).

No.	Length	VAC Range	Wt.	Each
NCVT2P	5.82"	12-1000	1	25.96
NCVT-5A	6"	12-1000	1	30.11

VOLTAGE TESTER

Tests AC voltages from 24 to 240V AC. Tests DC voltages from 32 to 330V. Built-in test lead holder on back of voltage tester holds the leads in one of two positions. Batteries not required.

120V AC GFCI RECEPTACLE & VOLTAGE TESTER

Plugs into Receptacles

Indicates Proper Polarity Or Mis-Wired Outlets Via Green & Red LEDs & Line Voltage Via LCD Display. Also Tests for GFCI Functioning

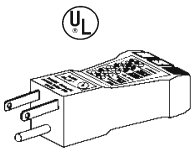

No.	Wt.	Each
61-517	1	31.89

CIRCUIT TESTERS

61-035

For 3-Wire 125-Volt Circuits. Tests for open grounds, rev. polarity, open hot, open neutral, hot & ground rev.

59090

Instant display of wiring condition of any standard 3-wire AC 110-120V outlet. Checks GFCI protected circuits

GT-10GFI

Trouble Shoot 120VAC 3-Wire Grounded Outlets. Test GFCI Receptacles.

RT110

Designed to detect the most common wiring problems in standard receptacles

RT210

Designed to detect the most common wiring problems in standard receptacles

RT250

Shows the time required to trip a GFCI device. Detect & identify common wiring faults. Detects Open Neutral Open Ground wiring fault.

61-051

Tests for correct wiring, open ground, reverse polarity, open hot, open neutral, hot & ground reversed w/ open hot in 3-wire, 125V AC circuits

No.	Description	Wt.	Each

3-Wire, Grounded Type; Electrical Work Application; 110 to 125 Volt AC Voltage; Neon Indication Type; Number of 6-Circuit Test

INSULATION RESISTANCE TESTER

- Tests insulation resistance up to 4000MΩ at 125/250/500/1000V
- Megohmmeter w/ test & lock buttons for simple insulation testing
- Warning alarm & high voltage icon for detection of voltage
- Measures up to 1000V AC/DC, resistance & continuity

PRICES

Effective pricing dates are listed on the front and back covers of this catalog. If an item on your order sustains a forced price increase, Dale Electric will notify you before shipment. At this time you are permitted to cancel your order for a full refund. Although every precaution is taken, printing errors can occur. We reserve the right to correct such errors.

RETURNS

Returned Goods Authorization must be obtained prior to returning any merchandise. A letter requesting return authorization must be submitted within 30 days of your receipt of goods. This letter should include the date of your original order and the reason return is requested. Non-Stock and Special Order items are not returnable without permission of the Manufacturer, and are subject to their charges. DO NOT return merchandise without authorization, as shipments that do not show our Return Goods Authorization number will be refused.

DAMAGE IN TRANSIT

In those very rare instances when a package is lost or an item is damaged in transit, Dale Electric assumes full responsibility for filing claims. YOU HAVE NO PAPERWORK OR INCONVENIENCE. At the time of delivery please inspect your merchandise before signing. If damaged or lost, please note so on the freight bill, and have the delivery driver sign it. Notify the carrier in writing and send Dale Electric the delivery receipt explaining what was damaged or lost. Damage must be noted on the freight bill. Dale Electric will then present the claim to the carrier on your behalf.

BACK ORDERS

In the event we are short an item on your order, we will automatically back order that item. Typically back orders are filled within two weeks, unless otherwise advised.

ADDRESS CHANGES

Please send us your updated address along with your expired address and we'll update our records accordingly.

INTERNATIONAL SHIPMENTS

Please contact customer service (01-518-793-3436) to review options.

CALCULATE YOUR SHIPMENT CHARGES (UPS)*

Step 1. Add up the total weight of your order.
Step 2. Using the Zone Chart and the first 3 digits of your zip code, find your UPS zone.
Step 3. Using the Rate Chart, find where your order weight and UPS zone meet.
Step 4. Enter this amount next to "shipping and handling" on the order form.

*The weight chart below takes into account package weight only. If UPS charges more for a shipment than the actual weight would normally cost, the additional charges will be passed along to the customer.
